Background: Looking for more data from different sources to test/modify the code written for template creation. To create annotated text - more data plus unified template

Observations Indian Kanoon:

1. Adjudication orders - the term isn't used
2. Tracing cases from SEBI website to Indian Kanoon - only found SAT orders
3. Higher number of SAT orders (insider trading)
4. Identifying the type of order on Indian Kanoon [some domain knowledge]
5. Very poor search results on Indian Kanoon

Probable approach ahead?

1. Switch to SAT orders [benefit - more data available]
2. Stick to Adjudication orders from SEBI only [20 to 30 orders] &/or find more data sources for it

Comparison between SAT & Adjudication orders

SAT ORDERS	ADJUDICATION ORDERS
Point of view: Offender	Point of view: Adjudication Officer
Questions the decision made by the Adjudicating officer	Details the findings and mentions the decision
Can be useful to find regulations that can be treated as loopholes or have multiple interpretations	Can be useful for understanding all the violations made by the offender and the decision on penalty
Entities: 1. Part of the violations 2. Date 3. Names of appellants 4. Name and Address of the company 5. Respondent 6. Decision - No merit in appeals therefore dismissed	Entities: 1. Date 2. Location 3. All Violations refereed to 4. Decision 5. Name of the company 6. Name of the offenders
